7th February 2025

To whom it may concern,

I have known Jai (Student ID 20045247) from August 2023 to the present day in my role as lecturer for the autumn semester final year undergraduate modules CS4287 Neural Computing, and CS4125 Systems Analysis and Design.

Jay graduated in August 2024 with a 2.2 Honours BSc Computer Systems. Jay has a deep curiosity about all things computing and has good knowledge of the field. He contributed quality code and content to team-based projects in my modules listed previously. He demonstrated an ability to work independently in an R&D context through his Restaurant Bot for his Final Year Project (FYP) over the full academic year for which he received B1 and B2 grades which are classified as “very good” to “good” performance on page 11 of the University of Limerick’s Handbook of Academic Regulations.

Jay has a great personality and was liked by his peers in a teaching and learning context. He has a strong sense of community and belonging, for example, he assumed the role of carer for a fellow student who became ill for a few weeks in June 2024. And while Jai will be challenged by the Masters, I’m confident that he succeed and add value to the collective experience.

Yours sincerely

07/01/2025.
