Summary

Motivated Software Developer with hands-on experience in building software solutions and providing IT support. Strong technical foundation in Java, Python, C++, SQL, HTML, CSS, and JavaScript (proprietary variant) evidenced through full cycle application development and support initiatives. Adept at Agile methodologies (Scrum) utilizing JIRA, with proven problem solving, clear communication, and effective team collaboration skills.

Education

Master's in Computer Networks, Advanced network design, security, and cloud based technologies | Expected graduation: September/October 2026
Toronto Metropolitan University

BSc in Computer Science, Algorithms, data structures, software engineering, and database management; extensive projects in software development, data analysis, and machine learning | September 2020 - August 2024
University of Limerick

Key Skills

- Software Development
- Java
- Python
- C++
- SQL
- HTML
- CSS
- JavaScript (proprietary)
- Agile Development (Scrum)
- JIRA
- Git/GitHub
- IT Support
- Database Management
- Debugging
- API Integration
- Problem Solving
- Communication
- Team Collaboration

Experience

Engineering Intern

Merlin Brands | September 2024 - March 2025

- Independently developed software applications from scratch, completing 50% of projects before handoff
- Created user-friendly interfaces using HTML, CSS, and JavaScript to enhance user experience
- Assisted in database management and optimization with SQL to support improved performance
- Employed Scrum methodology using JIRA within a solo development role in a small company

IT Support Specialist

Chandhok Global Inc | June 2024 - January 2025

- Delivered technical support for website development and IT maintenance for a 5-10 member team, achieving a 90% resolution rate in support calls
- Assisted in developing and maintaining internal software applications to boost operational efficiency
- Collaborated with cross-functional teams to troubleshoot hardware and software issues, ensuring prompt resolutions
- Conducted training sessions to foster end-user adoption of new technologies

Student Software Developer

L.M. Ericsson | May 2022 - January 2023

- Developed 8 to 10 new features for internal telecommunications software using Java and an in-house proprietary JavaScript variant
- Optimized software functionality and enhanced user experience through continuous improvements
- Applied Agile methodologies (Scrum) and utilized JIRA for sprint planning and retrospectives
- Engaged in comprehensive testing and debugging to bolster software reliability

Technical Skills

Web Development Technologies: HTML • CSS

Version Control & Project Management Tools: JIRA • Git/GitHub

Programming: Java • Python • C++ • JavaScript (proprietary)

Databases: SQL

Additional Highlights

- Authorized to work in Canada on a student visa until September 2026; plans to secure an open work permit for 1-3 years
